## Lieut. Gainer, in command

of Chicago's Motorcycle Police, points out how "Danger grows so familiar, and skill grows so great, during long hours of guarding the streets for the public's protection, that these men are game for any practice stunt."

Look at their two-wheeling human pyramids. And notice Hyland—he straddles a "team of bikes" and stays up. Even chugging *backwards* these brave boys in blue manage to stay up. And a form of protection known as OIL-PLATING will stay up on guard in your auto engine, instead of hastening Wear and Waste by draining down off duty! You simply change to Conoco Germ Processed oil, in the ordinary way—at an ordinary price—to have an OIL-PLATED engine immediately.

In this patented Germ Processed oil is the extra man-made substance with the constant magnet-like effect that makes OIL-PLATING stay up. Though you park from now till next month, or keep on the go like a bus, your engine's OIL-PLATING stays *plated up* to its topmost point every instant. Never is your lubricant all draining down from precious working parts, and so Wear has got to *Slow Down!* That's the plainest way of keeping down oil consumption. OIL-PLATE today by changing to Germ Processed oil at Your Mileage Merchant's Conoco station. Continental Oil Company
